

Madurai, Tamil Nadu

After the visit we were invited to the hospital to see its work and discuss a way forward to bring medical provision to the villages in the Madurai District.

The Main Entrance

David & "Jasmin"

The Complex.

This hospital offers such a range of specialist services, as out patient services, as well as having 35,000 admissions per year. As well as this facility, they offer, as a means of outreach, free children's camps, and run an old age persons home. There is very little money to pay staff and yet everyone is committed to the project and its success, to reach the poor and needy of Madurai District. This is an enormous resource challenge!! The hospital has a new Director. His wife has also joined him. As well as acting as Director, he is the ENT Dept. & the only Head & Neck surgeon. His wife is the only Gynae & Obs doctor at the hospital. It means 24/7 commitment.

Dr R. Gunasekaram

His Wife, Priscilla
